Blossom Dearie

The life and work of the late jazz/cabaret pianist and singer, Blossom Dearie, is celebrated with reverence and charm by this group of established UK musicians. Brought together by a mutual love of this often-forgotten jazz star, they revive Blossom's unusual songbook with affection and style. In addition to some of Blossom's original compositions, the show features the writing of Cole Porter, Johnny Mercer, Cy Coleman, Bob Dorough and Dave Frishberg among others. The music is full of wit and humour, as sharp as it is sweet. With skillful arrangements by Denny Ilett and a glowing line-up boasting previous credits including Lillian Boutté, Pee Wee Ellis, Dr John and Hannah Williams & The Affirmations, this project is not to be missed!
